### Obituary

The death of little Betty Lou Aubrey Jopling which occurred at her home in Calgary on Tuesday, October 17, came as a shock to the community, although she had been ill for some time, but no immediately fatal consequences were looked for. However all that medical skill and loving hands could do were of no avail, she passed quietly away at 1.15 p.m. Tuesday afternoon.

Deceased, who was six years of age, was like a ray of sunshine everywhere and will be greatly missed by her friends and companions, as well as in her home where she has left a vacancy that can never be filled. She was born at Sapulpa Oklahoma in 1927, coming to the Champion district in 1929, where she resided until 1930, when she moved with her parents to Calgary. A lovable and friendly little girl, Betty Lou had endeared herself to many during her residence in Champion.

Her parents, Mr. and Mrs. V.S. Jopling, grandparents, Mr. and Mrs. C.A. Johnson and an uncle, Mr. Harold Johnson are the immediate surviving relatives.

Funeral service was held at Jacques Funeral Residence on Wednesday afternoon at 3 o'clock, and the remains were shipped to Sapulpa for interment, accompanied by Mr. and Mrs. V.S. Jopling and Mr. and C.A. Johnson. The beautiful tributes of flowers testified to the esteem in which the deceased was held by her many friends. The sympathy of the community is extended to the relatives in their sad bereavement.

### Old Timer Dies Suddenly

Word was received in town Tuesday of the death of Mr. Bouzayan in Vancouver. Mr. Bouzayan had been ill for a week in the Vancouver General Hospital but hopes for recovery were held. The Chronicle joined with the community in extending their sincere sympathy to Mrs. E. Latiff and Mr. P. Bouzayan in the loss of their father.

G. Dupuy, accompanied by P. M. Patterson and R. Schultz expect to leave Friday by motor for Chicago where they will attend the Century of Progress.

The Ladies' Aid will serve a Chicken Dinner with all accessories at the Community Hall Saturday night, October 21st, starting at 5.30. Price, adults 35c, children under 12, 25c. All you can eat, come and bring the entire family.

On Monday, October 23, an auction sale will be held on G.F. Smith's farm, when his farm equipment and other miscellaneous articles will be offered for sale. Due to ill health Mr. Smith is retiring from farm work.

A. Hopkins will be the auctioneer at a sale on Thursday, October 26th, when N.M. Paulson, who is leaving the district, will offer his complete line of machinery, household goods, cattle, horses and other miscellaneous articles for sale.

### Dr. E. H. Freeze Leaves for Eastern Points

Dr. E. H. Freeze left Wednesday for eastern points. After a short vacation he will go to Chicago to take a course of study at the Post Graduate School of Medicine in that city. Dr. Freeze will be away about two months. During his absence his practice will be attended to by Dr. Carson and Dr. Dimock.

### Local & General

See, hear and dance to the famous Mart Kenney Orchestra at Champion on Friday, Oct. 27.

Mr. and Mrs. Wayne Anderson were Lethbridge visitors last week.

Born - To Mr. and Mrs. Dalgis, on Monday, October 2, a son.

Mr. and Mrs. R. Taylor, accompanied by Mr. and Mrs. W. Diemer, motored to Calgary on Friday.

Lyman Jopling spent the past two weeks visiting in Calgary.

Mrs. Boner and Dona have taken up residence in the suite of rooms above H. Cooper's office.

Mr. and Mrs. H. C. Jopling have taken up residence in their home in town.

Mr. and Mrs. D. Robinson of Barons were guests at the tea-charge on Friday evening.

Miss Mildred Boner, who has been visiting her mother in Champion, returned to Calgary Saturday.

Miss Noble and Miss Jackson of Nobleford visited at the tea-charge over the week end.

New Fall and Winter Caps, smart patterns, as low as 75c at Campbell's.

Mrs. Cain was a tea hostess on Friday, complimentary to Mrs. Kay and Miss Phyllis Kay of Vancouver.

Extra nice Fresh Parsnips, Carrots and Turnips, 10 lbs assorted for 25c at Campbell's.

See MART KENNEY in his wonderful Novelty Numbers at the Community Hall on Friday night, October 27th.

There will be no show Wednesday, October 25th, but on Friday, October 27th, comes "Cavalcade." Thrilling entertainment, with two showings, 7.30 and 9.30.

F. Clever, Searle Grain Agent is displaying several small mites found in wheat stored in his elevator. Several reports have been made of similar conditions existing in grain stored at other points.

The Champion Badminton Club held their first game of the season on Monday night. A good crowd were present.

WANTED - Some organization to serve coffee and sandwiches at the Mart Kenney dance, Friday, October 27th. Free use of kitchen and dining room for this service. Apply to H.E. Gill.

Cavalcade, "Picture of the Generation," Friday night, Oct. 27th. Two showings, 7.30 and 9.30. Without a doubt the finest picture of its kind, ever shown in Champion. Regular prices.

Men! Why shiver any longer when you can get pure Wool and Cotton Union Underwear for \$1.95 per garment at Campbell's.

## CHAMPION THEATRE

Friday, October 27th

## Water Diversion Project

Plan To Divert North Saskatchewan River To Solve Drought Problem

As a means of solving the drought problem of southeastern Alberta and relieving unemployment, a large-scale water-diversion project may be submitted to Prime Minister R. B. Bennett.

A diversion of the North Saskatchewan River, west of Red Deer, and a crossing of the Red Deer River at Content are the main features of the scheme. Sullivan Lake will be filled as the first of a chain of reservoirs, and the watering system would feed the Hanna area and the Assiniboia Valley, thence into southern Saskatchewan.

Under present conditions, it is claimed, the cost would total about \$20,000,000.

## The Circulation War

Big London Weeklies Find Premiums Too Costly

Lord Beaverbrook has seemingly taken the first step toward halting the big London newspapers out of the madhouse in which they have been living for half a year. The "war" for circulation among all of the leading dailies, with the magic number of 2,000,000 readers as the goal has been signalled by tremendous increases of free gifts, insurance schemes, crossword puzzles with \$5,000 for first prize, hundreds of thousands of sets of Charles Dickens at a nominal price, and the like. Lord Beaverbrook now says that four months of this has cost the Daily Express more than a million dollars, and he is convinced that such circulation is worthless and the whole procedure is ruinous.

Of course there is considerable economy which the London newspapers could have made. Their readers must have been as busy with their crossword puzzles, insurance coupons, guessing contests and works of Charles Dickens that they simply couldn't have had the time for the daily papers. Editors and reporters could thus have been dispensed with.

## Bentonite Clay

Valuable Deposits in Saskatchewan Establish New Industry

Possibility of the development of Saskatchewan's bentonite deposits in the Eastern district is seen by W. H. Hastings, industrial development officer of the Department of Railways, Labor and Industries.

Bentonite is a very fine grade of clay produced through the weathering and decomposition of volcanic ash deposits and is used for filter material for decolorizing oil, refining processes, for filter materials for the manufacture of paper and plaster, as a base for the manufacture of soap, and as the base of heavy clays.

Already a certain amount of development has been undertaken by the International Clay Products of Vancouver. The bentonite was shipped to the company's plant at Estevan for the drying process as an experiment. In order to make the product profitable, said Mr. Hastings, it would be necessary to put in a plant right at the deposits—Regina-Lake-Port.

## Meets Shindig Again

Cattle For Skintight Exotic Only In Northern Settlement

The only cow in the north country, taken to Gilman, Man., in 1927, has experienced the thrill of a life-time. Provider of milk for this little Hudson Bay Railway settlement, Gertrude, much excited, dashed wildly to the trucks when the first stock train over the northland railway arrived en route to Churchill. She paraded both sides of the 40-car cattle exchanging hails with the cattle destined for the markets of the United Kingdom. As the train headed northward, she stood on the trucks and bawled a lusty farewell.

## Worked For His Ride

An Ontario youth who hitch-hiked his way to a nearby city recently, states he is going to use a little more discrimination about whom he rides with in future. In going about seven miles with three middle-aged women he had to change two tires and walk half a mile for gas when it was found the tank was empty.

Instructor: "This, madam, is the harrow—it's put on very quickly in case of an emergency."

Madam: "I see—something like a limo."

Hornbills, birds with huge beaks which are nearly hollow and weigh practically nothing, have been found in Africa.

W. N. U. 2016

## AS THE BULLETS FLEW IN THE BLOODY HAVANA BATTLE

These pictures from turbulent Cuba take you into the battle line in the vicinity of the National Hotel in Havana, where a body of army officers hostile to the new regime were besieged by troops loyal to President Grau San Martín. The top picture shows a view of the hotel, from the besiegers' vantage point, during the battle; lower left, a machine gunner firing on the National from a balcony; lower right, another point of the firing line. Note Cuban youths braving death to witness the battle. Over 100 were killed and as many more suffered injuries from the flying bullets.

## One Of Old Fables

Carrots Were Used By Greeks Before Christian Era

Long before the Christian era the merits of the carrot as a medicinal plant were recognized. As the inhabitants of the old world gave up nomad life and settled down to rear plants, the carrot was one of the first to come under cultivation. Theophrastus, the Greek philosopher, in 320 B.C., mentions a plant which he calls *Stafylines*, but it is not certain whether he meant carrot, parsnip, or some other related plant. What is certain is that the purple carrot was known at least as early as it is impossible to say, but, Theophrastus is the first author, of whom there is record, to use the name *Stafylines*.

According to the Domitian Forge Crop Division, the first author who distinguished carrots from parsnips was the Greek medical writer and surgeon, Dioscorides, who on his many travels during the Roman empire was of his time, had the opportunity of seeing and describing a large number of medicinal plants. He uses the name *Stafylines* for the carrot and *Elafocarpus* for the parsnip. In the original Greek, the word *Stafylines* means resembling the grape, and so remarkable is the description given by Dioscorides that there can be no doubt the violet or purple carrot is being referred to.

While the white-fleshed carrot seems to be the only type apart from the purple that was known in the early ages, the yellow carrot seems to have been the most common from the end of the Middle Ages to the beginning of the eighteenth century.

The violet or purple carrot, which maintained its existence from the earlier ages, throughout the Middle Ages and up to the beginning of the 19th century, has entirely disappeared after more than 2,000 years of cultivation of which we are cognizant. The present day cultivated types of carrots all appear to have descended from a variety which can be found growing wild in most districts of Europe and the Western parts of Asia—St. Thomas Times-Journal.

## Prices Lower

Slight Drop Shown In Wholesale Prices For September

A fractional decrease in prices in the index number of wholesale prices on the base of 1926 equals 100, for September, when the figure was 66.9 as against 67.4 in August according to a report issued by the Dominion Bureau of Statistics. There were 84 quotations higher, 102 lower, and 316 remained unchanged.

Vegetable products declined from 65.7 to 62.5, animal products rose from 68.8 to 69.7, fibres, textiles and textile products advanced from 71.1 to 71.7.

Wood, wood products and paper moved up from 63.4.

## Consolidation Of Customs Act

A consolidation of the Customs Act, together with all amendments to the tariff, has been completed by officials of the national revenue department in a comprehensive volume just issued. The book contains all the Canadian trade treaties and interpretive notes for the guidance of importers. A number of explanatory appendices are added to the elucidation of that complex element of fiscal administration—the tariff.

## New Use For Thermometer

May Aid Fishermen At Newfoundland To Locate Codfish

Science may soon come to the aid of the fishermen in yet another way. The North American Council of Fisheries Investigation was told at its annual meeting in St. John, N.B., of a method, as yet undeveloped, for locating cod on Newfoundland's grand banks.

The method, as outlined by Dr. Harold Thompson of the Newfoundland Fisheries Research Commission, is simple. It hinges upon the cod's sensitivity to variations in water temperature.

Under Dr. Thompson's plan, a key ship equipped with temperature recording instruments would patrol the banks, sending out periodic information as to conditions in different areas. Fishermen, knowing where the water was warm and where cold, would be able to proceed directly to the places where fish were most abundant.

## To Protect Sacred Mountain

Japanese Priests Opposing Project For National Park In District

Priests of the Omikawaya Temple in Japan are strongly opposing a government project for a national park in the Yoshino mountain district, which the sacred mountain of Sanjudo stands. For more than a thousand years no woman has been allowed to climb it and if it is included in a state park that will mean the advent of women who will walk upon the mountain. More than 500,000 devotees, who would consider it a sacrilege for a woman to tread the mountain, are against the project.

## Helping Him Out

"I know what's passing in your mind," said the maiden. "I know, too, why you are calling here night after night, appropriating my time to yourself and keeping other nice young men away. You want me to marry you, don't you?"

"I—I do," gasped the astonished young man.

"I thought so. Very well, I will."

## Sponges Search For Food

Specimens Of Walking Variety Found In London Aquarium

Sponges that can walk about in search of food, instead of being forever anchored to one place have mysteriously appeared in tanks of sea water in the London Aquarium. Mr. Maurice Burton, the sponge expert of the British Museum, says that he has been unable to find any sponges of this kind among those previously captured by scientists. The habit of the sponge animals is to fasten themselves permanently to some spot on the ocean bottom and never leave it until they die, food being obtained by a continual current of sea-water in and out of tube-like passages which penetrate the sponge's body. Living specimens of the walking sponges, however, were collected and submitted to Mr. Burton, who verified the reports of the museum keepers that the sponges do creep slowly from a feeding spot to one where the supplies of provender are greater.

## Kind Words For Prince

Heir To British Throne Is Endorsed By French Newspaper

The New Parisian daily newspaper, "Le Jour," appeared recently with an eulogistic editorial on the Prince of Wales. "The Prince, with the physical resistance of an athlete, endowed with extremely keen intellectual faculties, possessing unshakable moral stability, is the master of himself, as he will one day be the master of half the globe," it said.

"What one likes about him is that besides being the heir to a vast Empire, he is a man strong and indolent, sure of himself and steadily watching his destiny approaching him."

Client: "You say the lady is worth \$50,000. Can I see before I decide?"

Matrimonial Agent: "Here is her portrait."

Client: "No. I meant the \$50,000."

Sales of luxuries have boomed recently in Bolivia while, at the same time, demand for necessities dropped perceptibly.

## Problem Should Be

Seriously Considered

Beatty Sees No Harm In Properly Controlled Immigration

Canada has nothing to fear from the "steady immigration of a relatively small number of people per annum under conditions of land settlement which will be carefully worked out for their benefit and for the country's protection," said E. W. Beatty, president of the Canadian Pacific Railway, commenting on his recent trip through western Canada.

Plans now under study forecast "moderate, controlled and financially supported" immigration, continued Mr. Beatty. The problem of immigration unfortunately was "confused in the minds of many with unemployment and crop failures."

The great importance of the problem was not being overlooked, however, "by those who realize that there is no real connection between unemployment and establishment on the land of those who will from the beginning be self-sustaining and therefore not a charge to the community."

"I think I would be one of the last in Canada to recommend anything which would accentuate our present unemployment situation," continued Mr. Beatty, "but I am satisfied that the kind of immigration now being discussed, involving settlement of lands of men who will be adequately supported and would become self-supporting, is a problem which demands serious consideration."

"It must not be forgotten that no intensive flow of immigrants is expected or desired, that even the most fertile colonies will require a year or more to become effective and that any plans made in 1934 will not be operative until at least a year later."

## Just Chance For Choice

People Can Put Leisure Time To Any Use

There is a very old saying that it is not sorrow nor trial that puts the severest test to human character, but prosperity and personal success. There is much truth in the saying, and many are in the fortune of the one that the surest test of a people is in the use to which it puts its leisure. Man works because he must. He makes the best of it and finds no reason for complaint, but rather for pride that he can do it well and in comfort.

But of his leisure he makes what he will. What he finds full evidence in the fashion in which he spends the time that is his to choose what he will do.

The matter happens to have become a very vital one right now. The American people are to be tested in the matter of their understanding of the blessedness of leisure.

How now, at last is a chance to follow one's own instinct for voluntary hours of fascinating and unsequential work, to have time for study, for reading, for unburdened works of human helpfulness, for digging in one's garden, for exploring the neighboring countryside, for knowing one's neighbors.

The word leisure itself, merely means the chance for choice.

For to understand, but with prodigal and joyful abandon is to find a new spirit in life, a new happiness in living, and a new heart for work when the working time comes round.

## The Best Of Reasons

His wife returned from the morning shopping expedition and called her husband into the room from the garden.

"Frederick," she said heavily, "when you came home last night you told me you had been to the Grand Hotel with Mr. Wilson. I've just met him. Why did you go with him?"

"When I came home last night I couldn't say 'Trocadero'."

Hubby groaned.

"When I came home last night I couldn't say 'Trocadero'."

Long Trip For Launching

A ship which was launched more than 3,000 miles from the shipyard where it was built is the yacht "Vamatic." The vessel arrived at Boston on the Hamburg-American freighter "Lemna" from Lemwerder, Germany, and was lowered overseas in Bloemfontein by a navy crane. She was assigned to a fleet of New York yacht brokers. Duties amounted to \$7,200, and cargo freight charges were \$2,500 more.

## Motor Fuel From Potatoes

All industrial uses of alcohol, as a fuel for motor cars in Ireland, as well as in industry, heating and lighting, has been developed from potatoes and will be more a government monopoly, it was revealed at Dublin. The estimated production cost is sixpence a gallon.

## An Unpleasant Experience

Halifax Teacher And His Companion Lose Way In Ghostly Cavern

Lost in a treacherous, damp cave, filled with carbon monoxide fumes, undisturbed by constant rumblings of tons of crashing rock, and battered by the slashing winds of bats disturbed in their dark solitude, is part of a story told at Halifax, N.S., by A. E. Ettinger, school teacher, who makes exploring of unknown places in his summer holiday pastimes. And the story is vouchered for by a red-tinted newspaperman, Mike Ryan, who also admits the experience wasn't his idea of a pleasant holiday.

Ettinger, secretary of the Halifax Men Teachers' Federation, returning from exploring 35 caverns of the big recess that he describes as a "great natural phenomenon which has baffled all attempts of science to explain," said the "junior rival to the famous Mammoth cave of Kentucky" is a plaster mountain on Richard Bay's farm at Maple Grove, near Maitland, Hants' County, Nova Scotia. Legend points to the place as one of Captain Riddle's treasure caches.

New humans ever have traveled to the innermost recesses of this cave where, Ettinger says, death awaits the unwary teacher. In the dangers, he adds, are from carbon monoxide gas and constantly falling plaster rocks. The cave, in which "hundreds of bats" can survive any length of time, ranged from at least 100 to 300 feet deep and extended more than a half-mile.

It was down in one of these chambers Ettinger and his companion found themselves up against a black wall, feeling dizzy and nauseated from poisonous fumes, their searchlights playing on countless shadows of bats swooping nighly about—and lost. The teacher, in desperation, crawled on his stomach along a dripping, narrow tunnel but he was unable to get his searchlights through the little aperture leading to the succeeding den.

Slight whiffs of fresh air that saved the explorers from the carbon monoxide, in their narrow confines for more than three hours, to believe another passage, as yet undiscovered, existed on the other side.

Describing his feelings when he and his companion discovered they were lost in what he aptly defined as a reproduction of Dante's Inferno, the teacher said:

"It was a terrifying experience. The thought of the carbon monoxide in the Mammoth Cave of Kentucky flashed through my mind. I at once dismissed such depressing recollections and tried to recall the lessons of my school of philosophy that matter does not exist except in one's own mind, but with boulders and bats for companions there was small comfort in this."

"Spurred on by the knowledge indicated by a growing darkness and a severe headache that the foul atmosphere inside the caverns was taking its toll, we began a methodical search for the exit. We carefully placed at strategic points on the white plaster walls for such an emergency."

"After search of perhaps a half hour our feelings which had bordered on despair were changed to joyful enthusiasm when, with one of our flash lamps, the batteries of which were fast running down, I picked up one of the arrows which had drawn with our bearings once more before it was perhaps only a few minutes before we reached the cave mouth although it seemed an endless journey. Although I was thrilled and amazed with what I saw within, I have no anxiety to repeat any similar exploration trip within its caverns."

## Amazing Flower Display

Annual Show In England Cost \$20,354 To Present

Amazing display of flowers was on exhibit at Southport, England. Among the more striking exhibits were thousands of roses and carnations, each at a foot wide, orchids that once belonged to Joseph Chamberlain, seventy-year-old cactus plants and a new fruit, raspberry crossed with a strawberry, achieved by a local botanist. The show is now ten days old. It could be closed to present and save \$25,000 is offered in prizes.

## An Escape-Proof Cell

As "escape-proof cell," C-112 at designed for criminals of the 12th St. Bailey type, was recently completed within the Denver county jail.

The cell is built of concrete with a double door of bars over the window and door. A steel cage is then set inside the cell, with a runway connected to the cage in the middle. A heavy steel door was fixed to the entrance to the cage and another to the entrance to the cell.

## FANCIFUL FABLES

# British Delegate At Geneva Stands Firm On Principle Of Protection To All Minorities

With a smashing indictment of the new German conception of racial homogeneity Great Britain outspokenly opposed, at Geneva, the German argument that her treatment of the Jews does not come under the provisions of the rights of minorities.

W. G. A. Ormsby-Gore, commissioner of works and British delegate in the political commission of the league, was applauded by the members as he begged his finger at Dr. Frederich von Keller, the German delegate, and declared:

"Wherever Jews have been in the course of the centuries, they have been the most loyal and helpful members of the nations. There is among the Jews a sense of historical continuity throughout their dispersal, and they do form a racial minority which deserves the same fair treatment as is extended to other loyal citizens of the nation to which they are attached."

The German argument is the Jews in Germany are neither a racial nor linguistic minority and therefore the minorities' treaties are not applicable to them. Von Keller announced the British attack by insisting the league had no competence in the matter; and it was unique problem demanding special treatment. The Germans also have attacked the whole previous conception of minorities by the new Hitler idea that a nation is an ethnic whole regardless of whether its members are within or without its frontiers.

The British delegate bluntly rejected this idea and did not mince his words. "We accept it," he said, "I hesitate to think of the responsibility of any government for all those in the United States who claim descent from the original Pilgrims and the 'flower.' There are about 3,000,000."

Great Britain herself consisted of three main races, the English, the Scotch and the Welsh, and these could be subdivided into many more, he said.

Playing what he called the German theory that a state has the right to concern itself with the citizens of its race living in other countries he grew increasingly emphatic as he lunched into one of the warmest defenses of the parliamentary system delivered in an international gathering since the advent of fascism and Hitlerism.

"Great Britain believes firmly in a parliamentary system in which the minorities can carry their voice to the government and all sides must be held before laws can be enacted. Likewise Great Britain believes in the freedom of the press."

"We have always set self-government even above good government," he also declared. "Great Britain will never abandon parliamentarism. The quality of freedom is the only thing that holds Great Britain—it is the free association of the people together by free guarantees that protects all minorities all over the world. One of the cardinal principles of the British Empire is that no person shall be deprived of the right to hold any post under the crown because of color, race or creed."

Meanwhile a German delegate told the economic commission of the assembly that some Jews had left Germany because of "their bad consciences."

The commission was discussing Dutch resolution seeking creation of a special organization to find homes for Jewish refugees, a proposal supported by the French, Spanish, Danish, and Czechoslovakian delegates.

The German said he opposed any discussion of the Jewish question as a political standpoint. President Count de Wiart, of Belgium, began selection of a sub-committee to study the idea, remarking "I suppose that the attitude of the German attitude Germany prefers not to be represented."

"You are right," the German replied.

Too Much For Him  
A small, Irish woman "gate crashed" the office of Mayor John P. Kennedy, 117, that he was by his famous plan, "Southern Cross," from New Zealand to England next fall if he could secure eight passengers. Two New Zealanders have booked seats with him at \$24.50 each.

Looking For Passengers  
Air-Commander B. Charles Kingsford Smith has announced in Wellington, N.Z., that he will fly his famous plan, "Southern Cross," from New Zealand to England next fall if he could secure eight passengers. Two New Zealanders have booked seats with him at \$24.50 each.

W. N. C. 1939

## Sodium Sulphate Plant

Refining Plant To Be Erected North Of Maple Creek

Immediate erection of a sodium sulphate refining plant to cost \$150,000 at Ingelbright Lake, 40 miles north of Maple Creek, will be undertaken by the Metallics and Non-Metallics, Limited, of Toronto, it is announced.

The first unit will be in operation within the next two months and will employ approximately 30 men. Ultimately this will be increased by 50 to 60.

The initial construction work which entails the expenditure of \$150,000 will be for the construction of a single unit utilizing an air expansion drying system. Ultimately the firm expects to enlarge their plant facilities to an excess of \$1,000,000.

According to T. J. Bartram, of Toronto, the sulphate deposits at Ingelbright Lake are the largest pure in the world, having 98.5 per cent. pure sodium.

## A Handsome Surplus

Indications are that the British Chancellor of the Exchequer will have a handsome surplus to report in his next Budget speech. This is explained by the fact that during the first half of the year revenue increased by £7,508,524, and expenditures decreased by £2,000,000. Attention of other Governments is directed to what may be done in the way of economizing in hard times.—Toronto Globe.

## SCOTT-PAINES SPEEDBOAT'S EFFORT RESEMBLES A COMET

Our picture, taken from an aeroplane, shows the remarkable effect created by Hubert Scott-Paine's speedboat, "Miss Britain III," as she tore through the sea at Fole Harbour to create a new record for the British sea mile. A few minutes after this picture was taken "Miss Britain" broke into flames and the engine was destroyed.

Our picture, taken from an aeroplane, shows the remarkable effect created by Hubert Scott-Paine's speedboat, "Miss Britain III," as she tore through the sea at Fole Harbour to create a new record for the British sea mile. A few minutes after this picture was taken "Miss Britain" broke into flames and the engine was destroyed.

## Flour Milling Industry

Holds Place of Third Leading Industry in Dominion

The flour milling industry in Canada is now the third leading industry with pulp and paper holding first place followed by slaughtering and meat packing.

Canadian flour mills now have a capacity far beyond the requirements of the domestic markets. The home market uses only 41,750,000 bushels of wheat for its domestic flour requirements while the requirements of the Canadian flour mills averaged around 67,500,000 bushels for the past few years.

The development of Canadian flour mills is largely accredited to the abundance of readily available water-power. Few of the big milling plants now depend upon steam since water-driven electrical equipment has largely supplanted that means of operation.

Four milling is the oldest of all Canadian manufacturing industries and dates back to 1805 when the first permanent Canadian settlement was made by the French at Port Royal, now Annapolis, Nova Scotia.

The substantial export business in wheat and flour from Canada had its inception during the time of the Napoleonic wars in Europe.

## Founder Of Silk Industry

Preparations were made at Canton, China, for the commemoration of Lu Chu, the famous imperial concubine of Huang Ti emperor of China. Traditionally accepted as the founder of the silk industry, history records that she discovered over 4,000 years ago the art of rearing cocoons. Under the auspices of the Bureau for the improvement of Sericulture, the celebration was held on the seventh day of the Seventh Moon, which fell this year on August 27.—China Weekly Review.

Professor Max von Schilling, famous German composer, has died in Berlin.

## Wheat Exports

First Six Months Of Year

The export of wheat during the first six months of the present fiscal year, April to September, totaled \$7,616,387 bushels, valued at \$60,279,046, says a report issued by the Dominion Bureau of Statistics.

Although in volume this was 10,581,453 bushels lower than the export of the corresponding six months of 1932 the value was only \$638,250 less.

The average export price of wheat per bushel in the past six months was 68.7 cents compared with 58.7 cents a year ago. In September the average export price was 75.9 cents, which was 19.2 cents higher than September, 1932, and 20 cents higher than September, 1931.

More emphatic still says the report is the effect of the rise in price when compared with the corresponding six months in 1931. During that period the export of wheat was 5,674,662 bushels higher than in the last six months, yet on the lowered export during the latter period the value was \$4,427,080 higher, the average export price in the six months of 1931 being 59.9 cents per bushel or 8.8 cents per bushel less.

## Records For Churchill

Deputy Port Warden Reports Three Established This Season

Captain Norman Martorell, deputy port warden at Churchill, in Montreal after inspecting and clearing steamers loading cargo at Canada's northern terminal on Hudson Bay during the harbor's second season, said three records were established at Churchill this season.

The largest cargo ever to be unloaded there was brought in by the S.S. Pennsylvanian with 1,000 tons of coal and 2,000 tons of general cargo. Four ships were tied up at the wharf at the same time and the first shipment of cattle, honey and lumber left aboard the S.S. Brandon.

# The Prosperity Of Dominion Depends Upon Prosperity Of Farmers Of Western Canada

## Explodes Popular Belief

Mr Leonard Hill States Draughts Do Not Hurt You

Many popular beliefs regarding fresh air and health were exploded by Mr Leonard Hill in his presidential address to the Sanitary Inspection Association Conference at Chatterton-on-Sea, England.

"Most people still think," said Mr Leonard Hill, referring to ventilation, "that they are tired and made uncomfortable by want of oxygen and excess of carbonic acid in crowded rooms and that the smell of such a room discomforts the presence of volatile poison."

Mr Leonard Hill stated that crowded rooms do not discomfort from chemical vitiation of the air but from interference with the loss of body heat and the congestion of the nose and nasal sinuses. He reflected in sensitive people by infra-red rays, these acting on the skin.

"It is believed by fanning the air and so cooling the skin and the mind without making any change in the chemical purity of the air," he said. "The Black Hole of Calcutta measuring eighteen square feet, had two small windows. In this, in 1756, were crowded 146 people. Nine hours later twenty-three individuals staggered out, the rest were dead."

"We know now that all these people died not from suffocation through want of oxygen, but from heat stroke. 'We have read recently of some forty-three geophiles travelling in a furniture van and twenty-four dying, and of three valuable leopards dying in the usual travelling boxes when exposed to the sun in hot weather.'"

"In place of prosecuting such cases the I.R.P.C.A. might be much better employed in teaching the public to know about the danger of heat stroke. The death of these people was due to over-heating and not to suffocation, as was supposed at the time."

Mr Leonard said we now know that the chill felt before the heat of fever was not the cause of the fever but the shivering stage which preceded infection.

And yet to this day children were mistakenly kept indoors in air polluted with microbes for fear of catching cold outside.

## A Common Occurrence

Suicides From New York's Tall Buildings Are Frequent

High buildings exert a fatal fascination on people whose minds are turned to the idea of self-destruction. Suicides from tall structures are a common in New York as to be commonplace. In one year 100 people were killed by jumping from high buildings. It was in May, 1929, that for the first time on record a man committed suicide by jumping from the Statue of Liberty, the colossal figure in New York Harbor. The statue was a gift from France to the United States and was unveiled in 1886. The pedestal from the foundation of the height to the torch is 300 feet. The Eiffel Tower, which was built 40 years ago, has been the scene of 111 suicides. The tower of the Westminster Cathedral has brought about 10 suicides, and in 1928, a few years ago a mother with two girls aged 12 and 7 were found dead after a fall of 250 feet.

## Japanese Are Patriotic

Rich And Poor Contribute Toward Military Funds

Military funds in Japan have been greatly expanded by patriotic contributions since the Manchurian trouble began and a large share of the money has come from school children and factory workers. Rich and poor alike have been encouraged to add to local funds for the purchase of guns, tanks, airplanes and other weapons for the army. Hardly a week goes by without a ceremonial presentation of an airplane by the management and workers of some large firm or of a machine gun mortar by the teaching staff and children of some school or college. Recently every officer and gun in the navy gave a month's pay toward national defense.

## Ease Pain, Headache in Few Minutes

PEG, IN FRANTIC, THIS WORK MUST BE DONE—AND YET A SPLITTING HEADACHE

DON'T WORRY, GET SOME ASPIRIN TABLETS AND YOUR HEADACHE WILL BE GONE BEFORE YOU KNOW IT—

LOOK WHAT I'VE DONE, PEG—ASPIRIN SIZE STOPPED THAT AWFUL HEADACHE—IT NEVER FELT BETTER!

I KNOW IT WOULD! ASPIRIN IS THE QUICKNESS SAFE RELIEF FROM PAIN

### For Quick Relief Say ASPIRIN—When You Buy

Now comes amazingly quick relief from headaches, rheumatism, neuritis, neuralgia, the fastest safe relief, it is said, yet discovered. These results are due to a scientific discovery by which Aspirin Tablet begins to dissolve, or disintegrate, in the minute space of two seconds after touching moisture. And hence to start "taking hold" of pain a few minutes after taking the illustration of the glass, here tells the story. An Aspirin Tablet starts to disintegrate almost instantly by you swallow it. And it is ready to go to work almost instantly.

When you buy, though, be on guard against substitutes. Be sure you get ASPIRIN's quick relief, be sure the name Bayer is on the box, and a cross is on every tablet of Aspirin.

Does Not Harm the Heart

## A Time For Thought

Winter approaches and the year progresses steadily to its close. The major activities of this great western agricultural land are rapidly being completed for another season. The hours of daylight are becoming fewer, the days shorter, and the evenings and hours of darkness longer. As Nature thus works out its annual cycle, man, too, alters the routine of his life. As his activities on the land become lighter, he rises later in the morning and retires to rest later in the evening. And he employs those evening hours in ways not possible to him when physically tired out from a long day's labor in the fields.

In the late Fall and Winter months thousands of people in Western Canada devote themselves to reading, to study, to forms of recreation, to community gatherings, to social life, to the pleasures of the home, to plowing, seeding, harvesting and threshing. The Fall and Winter becomes the time for self-improvement, for checking up of oneself, for planning for the future.

Possibly, because of the very nature of the times through which the world is now passing, with a multitude of, as yet, unsolved problems; because of difficulties to be overcome which are taxing the resourcefulness and taxing the courage of everybody; because of the danger of feelings of despair overcoming hopefulness and faith—because of such a world condition it is probable that people will do even more thinking and study than in times past.

Unquestionably people are thinking, perhaps as they never thought before. Admittedly, there is much loose thinking, reckless thinking, by some. There are others who, perhaps, imagine they are doing some real thinking but who, in reality, are simply others to think for them, and are merely adopting the thinking of others. But many others, probably the vast majority of people, are thinking for themselves, thinking seriously, and earnestly studying, and will continue to do so in even more earnest, serious fashion during the next few months.

Few investments, says one writer, are so sure and profitable as the effort to equip oneself in the four fundamental accomplishments:

1. How to think accurately and comprehensively.
2. How to express thought in talking and writing.
3. How to work skilfully with the hands.
4. How to take one's place among men.

The next four or five months will provide a golden opportunity for many of us to make such investments. As we read a newspaper, magazine or book, and obtain entertainment therefrom, the opportunity is likewise ours to think out for ourselves the wisdom or foolishness of the thought expressed or ideas advanced by the writer for the time being engaging our attention. It is an opportunity to test the accuracy and comprehensiveness of our own thinking.

Or, as we listen to some speaker over the radio, to an eminent clergyman, a man well known in public life, an outstanding figure in the financial or industrial world, a great scientist, inventor, traveller, author, or social worker, and as we listen intently, and hear definite opinions advanced, we, of course, advance our knowledge and are entertained. But we will have missed a real opportunity for self-advancement if, at the same time, we fail to ponder over and analyze what we hear, and bring our own thinking apparatus into full play, and apply the test of our own serious, concentrated thought, to the views expressed and the ideas advanced.

It will be to a good listener, a consistent reader, but it is better to be a student. Let us absorb from others; in that way information is gained and knowledge advanced. But let us do something more than a sponge which merely absorbs. Let us train ourselves to sift the true from the false; the good from the evil; that which is strong from that which is weak; selecting that which is constructive from that which is purely destructive.

There is much to criticize these days, and destructive criticism is about the easiest thing to do. But let us not be too ready to condemn. Let us try to commend and applaud. War with all its horrors and suffering is to be condemned—condemned as it should be. But let us not be too ready to condemn it, but even in the days of war there was nevertheless developed attributes of character of the finest and noblest type. The present economic depression is a world tragedy. The evils must be mitigated, a repetition of it prevented as far as it is humanly possible to prevent something over which man alone has no control. But let us not be too ready to condemn. Let us, slowly but surely, arising a greater conception of man's relations, duties and responsibilities toward his fellow man.

There is a better way of life for every individual, for every community and nation, for the world. It will be brought about, and the new era ushered in, not by some tremendous war, but by a rapid overturning of what now is and the equally rapid substitution of something else, not by the efforts of any one man, or party, or nation, but by the individual efforts of all communities and nations, and by the individual efforts of all men, women, boys and girls, and by the individual efforts of all who apply their own God-given powers and energies to the particular task which confronts them, and who are the real creators of, and leaders in, the new era that is dawning.

Now is the time for every person to sit himself or herself for the great work now at hand and ahead.

## Summer Complaint Plays Havoc With The Bowels

Few people escape an attack of summer complaint. It may be slight or it may be severe, but both the young and the old are liable to it during the summer months. You cannot tell when it will come but it is going to come. Let us run for a day or two and see how weak and prostrate it will leave you.

When the signs of an attack of any kind of the bowels take a few doses of Dr. Fowler's Wild Strawberry Tablets and you how quickly it will give relief.

Manufactured only by The T. M. Johnson Co., Limited, Toronto, Ont.

## London's New Lighting Scheme

### Famous Buildings Will Be Flood-Lighted On Certain Occasions

Classical visitors to London this winter will find town a much less gloomy place than they had been led to expect, states Douglas Webster, London Correspondent of the *Reynolds Leader-Post*. A lighting scheme has been planned and will be carried out this winter which will rid London of its reputation of a city of dark and gloomy places.

Famous buildings such as the clock tower of the Houses of Parliament, the National Gallery, Westminster Abbey, and St. Paul's Cathedral will be wired for floodlighting and illuminated at certain times.

The London society has the plans in hand. Its intention is to flood-light certain buildings frequently and especially on such days as have national significance. The cost will be borne privately.

The project was first mooted by the Incorporated Association of Architects and Surveyors some three years ago. Nothing came of it then, says the *London Society* has the matter well in hand and it is hoped that the first display of floodlighting under the society's auspices will also have with the British Industries fair which takes place early in 1934.

Although this floodlighting is deemed to be a temporary measure, the scheme will not stop there. The Royal Society intends to make it a permanent feature of the London season.

## DEPRESSED BY ACUTE ACIDITY

There can surely be no doubt about the effectiveness of a remedy for acidity in various forms. The writer has found such a remedy in the form of a small tablet in this woman's case—

I suffered for many years from acidity in various forms. The writer has found such a remedy in the form of a small tablet in this woman's case—

"At last it came so acute that every morning I was wakened by a gnawing pain and a great depression of spirits. I tried Kruschen Salt, and the effect was immediate. The pain subsided and the depression lifted like a cloud. I have the daily habit of taking such a small tablet and I never feel such a loss of spirit again." (Miss) E.M.H.

Kruschen is so effective with acidity because it neutralizes acids, takes all the torment out of it, and gently cleanses the system. And by stimulating your organs of digestion, it helps to perfect regular action. Kruschen will prevent this harmful acid from ever accumulating again. Kruschen has no harmful effects, and no loss of spirit.

### Report Col. Fawcett Is Alive

British Explorer And His Son, Missing Eight Years, Said To Be Held In Prisoners

Reports were received at Rio de Janeiro, that the British explorer, Colonel H. Fawcett and his son, who have been missing eight years, are alive in the jungle.

A dispatch from Cayula, Matto Grosso, to the newspaper, *Estado*, quoted Ara Bezerra, a planter in Parana, as saying that an Indian woman told him two white men were being held prisoner by Cingru Indians in the Xingu district, a 45-day journey from Parana.

Similar reports have not been confirmed.

### New Inheritance Law

Jews Cannot Inherit, Sell, Or Divide Farms In Germany

Germany's small farmers became a "privileged" class when Chancellor Hitler signed a revolutionary law inheritance law whereby Jews are not permitted to sell or divide lands among heirs. The law defined an "inheritable" farm as a tract including arable and forest land not exceeding 210 acres and possessed by a capable farmer. The law says that the farm of such a farmer must be sold to a owner shall henceforth be called a peasant. A peasant must be a German citizen of German or kindred blood and honorable.

### New Members Of League

Argentina, Australia and Denmark have been elected to seats on the League of Nations Council. Argentina received 49 votes of 53 cast; Denmark received 25 votes of 47. The three were elected for three-year terms as non-permanent members. They succeeded, respectively, Guatemala, Norway and the Irish Free State.

Germany is estimated to now have 500,000 men and 12,000 women transients.

Canada has been the leading exporter of flour to the Trinidad market for many years.

Salary cuts in salaries of employees of West Sussex County, England, made in 1934, have just been restored.

W. N. U. 1936

## If you want to feel WONDERFULLY BETTER

take Wincarnis

THE GREAT TONIC

THAT SOOTHES NERVES, ENRICHES BLOOD, BUILDS NEW VIGOUR

At all good Drug & Dept. Stores. Sales Agents: Harold J. Rich, Co. Ltd. Toronto, Ont.

## Foresee Maritime Touns Moored In Atlantic

Fore-runner Of Many Others Likely To Rise In North Sea

A vast untapped island, fore-runner of many others which will give to the world a new race of island dwellers, is said by a Berlin correspondent likely to rise shortly in the North Sea. A time in the near future has been forecast when there will be maritime towns moored in the middle of the Atlantic and complete with luxury hotels and landing grounds for aircraft. The islands will have their own power and will be begun from the mainland and in between the island communities, aerodromes with general wireless facilities, will be built. Then will come the health seekers. Week-enders will discover this new world from their doorsteps. The islands will have their trees, flowers and gardens. The sea will be harnessed to provide electricity, and the wants of the communities will be supplied by cargo-carrying aircraft from the mainland.

### More Work Under N.R.A.

Expect One Million Or More Have Been Re-Employed

Possibility that the count now being plotted in the United States by the N.R.A. may show re-employment of 1,000,000 or more persons in excess of present estimates is being held out by statisticians to Hugh S. Johnson, the administrator.

They have calculated that the actual count of noses by direct solicitation will reach tens of thousands of employers who do not report regularly through ordinary channels and who show that more re-employment of 5,000,000 persons have found work since the low mark of last winter. The present accepted figures, based largely upon reports from the department by industry and upon trade union estimates, run to approximately 2,500,000.

## Good Way To Stop Acid Stomach

Any drugist will tell you the best way to stop acid stomach and indigestion is to take a little Bismarck Magnesia in water after meals. This will stop your indigestion and sweeten the stomach, get rid of gas and belching in time. Ask any drugist.

## Barter Is Natural History

Barter has been winning its way into our department of life in Great Britain as well as elsewhere and now has entered the realm of natural history. A number of studies, the first of their species caught in England, have been exchanged by the first of Hull with a natural history museum for a whale.

### Reproduces Natural Colors

Dr. Charles A. Tisdler, of Massachusetts Institute of Technology, has evolved a special process for reproducing natural colors of photographic objects on lantern slides. He has a set of slides illustrating geology, botany and anthropology taken in all parts of the world.

## TIRED AND IRRITABLE?

Take Lydia E. Pinkham's Vegetable Compound

It stops the nerves and helps to build you up. You will rest better... sleep better... look better. Life will seem like living again. Remember that 98 out of 100 women say, "It helps me." Let help you too. Liquid or tablet form, as you prefer.

## Japan's Activities In Pacific

### Writer Claims Japan Intends To Put U.S. Out Of The Picture

"Japan is now definitely and methodically preparing to put the United States out of the west Pacific picture as she did Russia in 1904," said Upton Chase, author and lecturer, who passed through Russia after a trip to Japan and Hawaii.

"When President Roosevelt authorized resumption of building the United States navy, the Japanese gave up hope of bluffing and persuading the people of the U.S. to withdraw from the Pacific," he said. "Japan now means business."

The author said he was humbled from Manchuria because of his criticism of Japanese activities in that state.

"The Japanese people have been propagandized to the point where they will now not permit any ruling clique to abandon the campaign for domination of China and the Pacific," he asserted. It was high time the people of North America ceased to be deluded by Japanese Government officials who declared war with the U.S. was "unthinkable."

## Aurora Not Connected With Weather Changes

Opinion Of Leader Of British Royal Year Party

The aurora borealis, so far as known, has no connection with weather changes, Dr. J. M. Stagg, leader of the British royal year party, told interviewers at Winnipeg. Many people have held the belief that the aurora meant a change in weather. If it appeared during warm weather, they held, lower temperatures would be followed within a few days, and its appearance during cold weather would mean the coming of warmer days.

Dr. Stagg's study in the far north, at Fort Rae, North West Territories, failed to confirm this belief. He did not observe any connection between aurora and weather, and had a direct effect on short wave radio communications.

### Pictures Made Of Cloth

#### Work Of Finnish Artist Resembles New Type Of Oil Painting

Pictures made of pieces of cloth chosen for their colors and stuck to a flat surface are on exhibit in Montreal, the work of a Finnish artist, Elias Merikallio. There are many scenes, flower pictures and even a few figures, in which scraps of woven stuffs have been used to produce the effect of flesh painting. Silk, muslin and all kinds of textiles are used and a great deal of patience and skill must have been required in working them into pictures to gain some striking effects which are quite surprising in the nature of the newest types of oil painting.

### A Very Old Ailment

#### Mastodons Suffered From Toothache Millions Years Ago

Toothaches did not originate with the advent of man. It is revealed in a visit to the dental exhibits at "A Century of Progress," in Chicago.

More than a million years ago exhibited reveal the mastodon, bison, bison and sabre-toothed tigers were suffering from aching molars. "Toothaches in a camel a million years ago," reads the sign above one display in the exhibit located in the Jaw of Science. Beneath is the jaw bone of an early ancestor of our present-day camel.

### An Unusual Concert

#### Glee Club In England Composed Entirely Of Grandfathers

Grandfathers formed a Glee Club and gave a concert at the Royal Albert Hall, recently. Nine grandfathers sang, one grandfather played the accompaniment and the "call boy" was a grandfather. The members of the audience and grandmothers helped with choruses of such songs as "Remember Me" and "Dearly Beloved." "Running Up and Down Stairs" and "The Girl in the Pink Dress."

### Gives Speed Exhibition

Who calls this a young man's world? At the Halifax County Fair, held at Middle Musquodoboit, N.S., George Landella, a man of 80, gave an exhibition of speed, driving his own fast horse, to the delight of the spectators.

Cigarettes produced in Egypt in 1934 are estimated at nearly 5,000,000,000.

Farmers of the island of Jersey are jostling out over progress. The highest potato crop in 13 years.

Some folks don't even like to get up to see the dawn of a new era.

Put Where the Test Begins

Yes, sir, there in the pipe bowl is where tobacco does its stuff. And right there is where Ogden's Cut Plug shows itself to be downright good pipe tobacco. For Ogden's packs right, lights right and burns right... Cool, sweet and fragrant from beginning to end.

See if you don't agree that Ogden's is the tobacco for your pipe. Load the bowl and let the test begin.

## OGDEN'S CUT PLUG

If you "roll your own", use Ogden's fine cut cigarette tobacco and Chanticleer cigarette papers

### Again Seeking Franchise

#### Another Attempt Being Made By Women In Quebec

Arrangements whereby a measure seeking the provincial franchise for women in the Province of Quebec will again be completed in the near future will be completed shortly, it was announced at the opening meeting of the League for Women's Rights in Montreal.

The league will also petition the provincial government to enact legislation requiring all vehicles to carry lights at night, in view of the many cases of loss of life resulting from collisions between automobiles and unlighted wagons.

"So you are the sole survivor of a shipwreck? Tell me how you came to be saved."

"Well, you see, I missed the boat."

London is to have its first camping, hiking and auto sports exhibition in April.

### Sweet scented gladiolus blooms are a new triumph for flower growers.

### STOMACH COMPLAINT

Stomach complaint is a common ailment. It may be slight or it may be severe, but both the young and the old are liable to it during the summer months. You cannot tell when it will come but it is going to come. Let us run for a day or two and see how weak and prostrate it will leave you.

When the signs of an attack of any kind of the bowels take a few doses of Dr. Fowler's Wild Strawberry Tablets and you how quickly it will give relief.

## OCCASIONAL WIFE

By  
EDNA ROSE WEBSTER

Author of "Joretta," "Lipstick Girl" Etc.

## SYNOPSIS

Camilla Hoyt, young and beautiful commercial artist, and Peter Anson, a struggling sculptor, are in an art class and fall in love. She is the adopted daughter of a wealthy family, but is not to share in their fortune when she comes of age. They are faced with the problem of "marriage or career" and Camilla does not want to let the money which she has so much promise as a sculptor. At an art school dance, Gus Malson, Peter's roommate, who is jealous of Peter's success, takes Camilla out on the lawn to tell her "something she should know about Peter."

(Now Go On With The Story)

## CHAPTER XIII.

"Well," began Gus, exhaling the smoke of his cigarette, noisily, and turning toward Camilla. "You've got to get to know a guy when you live with him. And I'm telling you now that Peter is not good enough for a sweet little kid like you. He has a dozen skirts after him all the time, like the moths around that light over there. Why? Because he kids me along and makes each one think she's the berries for him. D'you know how he's payin' his way through school? On the money he gets from rich dandies like you! Has he touched you for a payment yet?"

"You are despicable," Camilla told him in a deadly calm voice. "I tell refuse a word you are saying and I believe to listen any longer!"

"Oh, yeah?" his laugh was ugly. "I'll bet you are beautiful to look at when you're mad like that. I told you I'm crazy about you and I meant it. If Peter is good enough for you, so am I—" and before Camilla was aware of what was happening, his arms were holding her in a vice and his mouth was seeking hers while she struggled violently to free herself.

From behind them, a doubled hand struck out swiftly against Gus' face and Gus' head and sent him sprawling up on the ground. At the same time, another arm grasped Camilla's shoulders and prevented her falling from the force of the blow that separated them.

"Did he hurt you, dear?" Peter was breathing hard, from anger and exertion.

"No, but I hope you have hurt him." She was trembling, too, with anger. "Not because of me but for what he was saying about you."

"I heard enough," Peter said curtly. "which doesn't matter." But I'm sorry I am responsible for introducing you to such a bum."

He walked around the bench and stood above Gus, who rolled over then and put his hand tentatively to his bruised jaw. Peter assured him that his victim was only stunned, stood up and adjusted his own tie and clothes, and took Camilla's arm.

"Shall we go back to the party and forget this unfortunate affair? Glad I came out here to look for you. I missed you and had already told you I danced with you, so I suspected something was wrong." He was trying to dismiss the incident and sound casual, but his voice still shone uncertainly. "I know you wouldn't voluntarily cut the dances you had promised me."

"But, Peter, he said those terrible things about you!" She was still trembling with her own resentment.

and wondered how Peter could dismiss the thing so calmly. "But you don't believe them, darling?" he asked quietly. "Of course not!" "Then, that's all that matters. You know, the world has so many people in it that there just have to be some like that—ungrateful and jealous and malicious. But time is too precious to waste even thinking about them. From now on, we'll just forget Gus. People like that just hang themselves with their own rope. He can shift for himself, as he did before I told pity to him. At least, that's one load off my mind!"

"Do you mean," Camilla was incredulous, "that you have been keeping Gus—?"

"Most of the time, he shrugged indifferently. "And he could say that!" she exclaimed with dismay. "Well, this world surprises me a little more every day—the people, I mean."

"Sure, the world is fine. It's the people—regular hodge-podge. Interesting, though," he added thoughtfully. "Every good man has his virtues. Even our human nature makes me feel a little bit wiser and more able to cope with it in general. As Tennyson said, I am a part of all that I have met."

"Oh, Peter, you're so fine yourself!" she told him with loving admiration. "that you can find some good in everything." He pressed her hand that was tucked into his arm, as they walked slowly back to the auditorium. "That's because you think so, honey." He said with characteristic modesty.

The last half hour of their date had dropped to the floor which was strewn with confetti, serpentine and streamers. The orchestra had crooned goodnight.

"You are despicable," Camilla told him in a deadly calm voice. "I tell refuse a word you are saying and I believe to listen any longer!"

"Oh, yeah?" his laugh was ugly. "I'll bet you are beautiful to look at when you're mad like that. I told you I'm crazy about you and I meant it. ## THE CHRONICLE, CHAMPION, ALBERTA

## Foot Guards Won Out

Regiment of King George Can Now Ignore Traffic Light

King George of England's proud regiment of foot guards has just won a big peace-time battle without firing a shot.

Maybe the victory will not be shared with the regiment's officers, but all the same the guards are very jubilant, for their conquest means that in future they will not have to obey London's intricate system of traffic signal lights when on the march to the capital.

The first skirmish occurred two years ago when traffic lights were first coming into use on a big scale here, and an impatient light in Regent St. dominated one of the regiment's proudest battalions.

Guardsmen were up in arms at this affront. Not even Napoleon was able to cut up the guards, they said in effect, and they saw no reason why a little red light should be able to do it.

Then a few weeks later another battalion lost its drum major through another warlike act on the part of traffic light. The drum major marched on proudly, twirling his ceremonial staff, imagining his drum major in hand. First he had become a mere unit of one, that the rest of his colleagues had had their advance stemmed by a mere red light.

The last straw came when the police commissioner announced he had approved the erection of 440 traffic lights at crossroads throughout the capital.

Declaring that so many lights would mean that the guards would be confined to barracks forever, the military authorities took the matter in hand. First they sent out scouts with maps showing how they could avoid routes in which red lights were operating, but this involved giving up many of their duties.

Now they have scored a final victory. In future a traffic officer will be stationed at every signal light when the guards are out marching, and the officer will have orders to disconnect the signals until the troops have passed.

Never again will His Majesty's guards be cut up.

## THE RHYMING OPTIMIST

By Aline Michaelis

## OF SMALL THINGS

A little hill can hide the boundless ocean,  
A scrap of cloud can shut away the stars.  
A creeping doubt can dim long years' devotion,  
An hour of sin a whole life's virtue mar.

Who doubts the oak is in the acorn  
Or that today holds keys to days to be,  
That far events which wait for us  
Arise from choice which binds or sets us free?

Since fleeting cause can wreak such dire disaster  
He who is wise holds naught too slight to heed,  
Amidst all things, as of great he will be master,  
Expressing truth in his most trivial deed.

## An Anti-Bandit Gadget

Invention May Lead To Lower Insurance For Cars

Cheaper insurance for motor cars is likely to be one result of an anti-bandit gadget invented by ex-Chief Inspector Wensley, of Scotland Yard. The device, which is being manufactured in the Midlands, consists of a steel-shutter bearing in hold of the word "Parked." It pulls down like a blind behind the windshield and automatically becomes locked.

A car thief would have to use strong tools to remove it. Prominent insurance brokers and companies have decided the motorists using the shutter will be able to secure a reduction of 15 per cent. of the premiums for all private cars and commercial vehicles.

## Princess Mary Better

The Princess Royal, the Countess of Harewood, has practically recovered from her recent illness, but she is barred from undertaking public engagements for another month. She recently inspected Broadcasting House, the new headquarters of the British Broadcasting Corporation, but it was a personal visit and in no way a public ceremony.

Men are becoming ardent patrons of London department store bargain sales.

## Little Helps For This Week

"As we have therefore opportunity, let us do good unto all men."—Galatians 6:10.

I ask thee for a thoughtful love, through constant watching wise, To meet the glad with joyful smiles, And to wipe the sweating eyes. And a heart at leisure with itself, To soothe and sympathize.

—A. L. Waring.

Surely none are so full of cares or so poor in gifts that to them also, waiting patiently and trustfully for God for His daily commands. He will not give direct ministry for his increasing according to their strength and desire. There is so much to be set right in the world, there are so many to be led and helped and comforted, that we must continually come in contact with such in our daily life. Let us only take care that by the glances being turned inward or strayed outward we do not miss our turn of service, and pass by those to whom we might have been sent on an errand straight from God.—St. Charles.

Look up and not down, look forward and not back, look out and not in and lend a hand.—Edward E. Hale.

## One Of Queerest Trades

Professional Writer Of Speeches Has Office In London's Famous Strand

Entitled to a high place on the membership list of the club of queer trades is surely the professional writer of speeches who occupies a key position in London's famous Strand. His enterprise and originality have at all events brought him success, for since his idea was first put into practice, a few years ago, he has written hundreds of speeches on the most diverse subjects. Titled and produced by all sorts of apply him. For the most part, however, his clients' requirements are of a more ordinary nature, and consist of demands for after-dinner speeches, and addresses for bazaars, presentations and similar functions. The writing of political speeches at times also forms a considerable part of the nimble speech-writer's activities; and on many occasions he has been called upon to write both "for" and "against" the same party and subject.

## New Kind Of Sky-Writing

Partially Frozen Smoke Makes Messages Legible For Longer Period

Successful tests of messages in smoke frozen on the face of the sky have been made in England and it is believed that they soon will be a familiar feature of daily life. The airplanes producing these messages work at a height of 20,000 feet so that the pilots have to wear electrically heated suits. The intense cold at this altitude partially freezes the smoke as it comes in contact with the sky, and thus makes the messages legible for a longer period than usual. Also at 20,000 feet atmospheric disturbances are less. Night sky-writing by means of a new searchlight projector throws colored patterns on the clouds.

## Queer Idea For Holiday

Young Englishman Crossed Ten Deserts In Lone Motor Trip Ideas for holidays vary. Nicholas Bonini's tastes were expressed in a lone motor trip through India, North Africa and Europe, crossing ten deserts on the way, with only a thermos flask of water in his car. He is a young mines manager on leave. He has just reached London, England, and his speedometer registers a journey of 11,568 miles. He claims he has made the first solo journey ever attempted over this route.

## Drive Against Typing

"Down with typing!" is the slogan of a new organization of artists, writers and publishers in Paris. It was a personal visit and in no way a public ceremony. The organization is a campaign to end the abolition of type under all circumstances, and to replace them by salaries paid by the employer or by payment on the money collected by the employees.

## Pigeon Brought First Aid

When lost to find a pigeon took refuge on a ship in the Bay of Biscay in an exhausted condition. The owner had hope of recovering it, but a few days later it came back with a message tied to it which told him that it had been fed and cared for.

## New Coal For Fireplace

A new chemically-treated coal for the open fireplace burns with a pleasant odor, and another new fuel produces flames in any color to match the decorative plan of the room.

## CHICKEN SHORTCAKE

2 cups pastry flour  
(or 1½ cups of bread flour)  
3 teaspoons Magic Baking Powder  
¾ teaspoon salt  
4 tablespoons shortening  
1 egg ½ cup water

Sift dry ingredients; add shortening and mix in thoroughly with a steel fork. Beat egg and add sufficient water to make soft dough. Roll out with hands on floured board. Cut out with large floured biscuit cutter, or half fill greased muffin tins which have been placed on greased baking pan. Bake in hot oven at 475° F. about 12 minutes. Split out before white hot and fill with hot creamed chicken. Makes 8 shortcakes.

Try Miss Alice Moir's light, flaky

## Chicken Shortcake

"I always use and recommend Magic Baking Powder," says Miss Alice Moir.

Director of the finest apartment-house restaurants, "Magic Cookbook" will give you dozens of recipes for delicious baked foods. Write to Standard Brands Ltd., Fraser Ave., Liberty St., Toronto, Ont.

In wholehearted agreement with Miss Moir, the majority of Canadian dietitians and cookery teachers use Magic exclusively. And 3 out of 4 Canadian housewives use Magic because it gives consistently better baking results.

No wonder Magic controls all other baking powders combined! Favour your family with Chicken Shortcake—made with Magic as Miss Moir directs. Notice delicate flavour, its feather lightness!

Free Cook Book—When you bake at home, the new Magic Cookbook will give you dozens of recipes for delicious baked foods. Write to Standard Brands Ltd., Fraser Ave., Liberty St., Toronto, Ont.

## SAYS CANADA TO GAIN FROM WHEAT PACT

Edmonton, Alberta.—The wheat agreement signed in London, England, last summer, was the first effort to coordinate production to demand, Prime Minister R. B. Bennett told a mass meeting here, "and Canada stands to gain most from it." For the third time, Mr. Bennett faced a capacity audience of Edmonton people and received an attentive hearing as he told of the developments affecting Canada since his government took office.

Referring again to the question of a central bank for Canada, Mr. Bennett said that the resolution signed unanimously at the world economic conference on the subject of currency stabilization and exchange, contemplated the establishment of central banks in all "developed" countries.

"To clear up any question that may exist," Mr. Bennett continued, "I may point out that that resolution meant, of course, that Canada should have a central bank of her own."

"Wheat is still king among the factors contributing to the prosperity of the world," the prime minister continued, "and unless a husbandman is producing this commodity at a profit, there can be no real prosperity."

### Island Prison

United States Plans New Way To Deal With Gangsters

Washington.—A prison island has been selected by the United States justice department for the future home of desperate gangsters, kidnappers and other persistently troublesome federal convicts.

Attorney-General Cummings, in outlining the plan Thursday, said the prison island would be located in the underworld characters who foster rebellion among prisoners, attempt to bribe guards and have influential organized gangster friends at large who are constantly attempting to aid in their escape.

Alcatraz Island was selected for the purpose. Its rocky shores rise precipitously from San Francisco Bay.

### "Royal Scot" Leaves Chicago

Starts On Tour Which Will Terminate In Montreal November 22

Chicago.—The "Royal Scot," England's crack train has headed for the west coast after having been viewed by more than 2,000,000 visitors at a Century of Progress Exposition.

It steamed out of the fair grounds under its own power and was scheduled to depart from the Union Station for a tour that will take it to California and the Pacific coast and back to Montreal, where it will be loaded on a ship for its return voyage November 22.

### Revenue Restored To B.C.

Privy Council Judicial Committee Finds Fuel Oil Tax Valid

London, Eng.—Nearly \$400,000 in revenues is restored to the province of British Columbia by a judgment of the judicial committee of the privy council which finds British Columbia's Fuel Oil Tax Act of 1930 is valid. The act is half-cent a gallon. The tax, in their lordships' opinion, is direct taxation within the meaning of section 92 of the British North America Act, and therefore intra vires.

### Favors Currency Inflation

Calgary, Alberta.—Currency inflation to raise \$100,000,000 for erecting public buildings and other public works, was urged by Hon. Charles Stewart, Edmonton Liberal member in the House of Commons, in an address here to the Young Liberal Club. Mr. Stewart believed if this step was taken relief camps would be unnecessary.

### Only Three Needed

Washington.—Report of prohibition in the United States swept into its final stage with every indication that the 18th amendment will be voted out of the constitution on Nov. 7. On the day six states will ballot on repeal. Approval by only three is needed to cancel the prohibition amendment.

### Cancer Cases Cured

Chicago.—Surgeons reported 12,746 cases of cancer have been cured in the last three years. Thirty-one specialists reported this progress in a symposium entitled "Cancer of the Colon," sponsored by the American College of Surgeons.

W. N. T. 1916

## Better Understanding

U.S. Minister To Canada Speaks At Ottawa

Ottawa, Ont.—"I want no green bases cloth on our council table, and no jockeying for petty advantage," Hon. W. D. Robbins, United States Minister to Canada, told the eighth annual convention of the Canadian Chamber of Commerce at the annual meeting of that body here. Mr. Robbins was one of the guests spoken together with Hon. H. H. Stevens, Minister of Trade and Commerce.

The United States envoy assured his hearers he would do everything in his power to bring about complete understandings between Canada and the United States.

J. H. Woods, of Calgary, a past president of the chamber, voiced the appreciation of the gathering for the addresses.

The convention devoted several hours to an open discussion of ways and means by which government expenditures might be curtailed.

Three suggestions emerged from the discussion. One was that the national committee appointed last year at Halifax be allowed to continue its campaign for education for government economy.

Another was designed to establish a committee which would work with these various administrations for the better understanding of their respective spheres, while a third was a straight resolution looking to the appointment of a small committee whose duty would be to prosecute a campaign for the lowering of government expenditures.

## Railway Wage Dispute

Believed Press Comment Not In Interest Of Either Side

Ottawa, Que.—The interest of both sides would best be served if negotiations continued in Canada and if no attempt was made by the press to gauge the tenor of the meetings. It was stated at the conclusion of recent negotiations between the Canadian Pacific and Canadian National railways.

As far as could be learned, the position is stationary, both the men and their employers persisting in their respective opinion. The men claim an additional 10 per cent. wage cut is unjustified; the companies that it is made necessary by adverse economic conditions affecting the roads.

While these negotiations were proceeding the Brotherhood of Railway and Steamship Clerks made their submission to a board of conciliation in rebuttal to the case submitted some time ago by the Canadian Pacific Railway.

## Rail Workers Warned

Must Not Wreck Machinery Of Industrial Disputes Act

Montreal, Que.—Warning that railway employees should take no action to wreck the machinery of the Industrial Disputes Act was given to members of the Brotherhood of Railway and Steamship Clerks by Lynn B. Spencer, K.C., chairman of a board of conciliation appointed to hear a dispute between the brotherhood and the Canadian National railway.

The chairman's warning came after he had granted the request of Frank Hall, vice-president of the brotherhood, for postponement of the hearing. Negotiations between the running tracks and the two Canadian roads made the postponement necessary, argued Mr. Hall.

## More Cold Storage Foods

Ottawa, Ont.—With the exception of eggs, pork, fish and apples, all food commodities in cold storage on Oct. 1 showed an increase in the corresponding period last year, the Department of Statistics announces.

## PLANES VERSUS WARSHIPS—SCENE FROM THE "WAR ZONE"

This impressive photograph was taken from an aeroplane above the clouds, looking down on an incident in the British aerial-naval manoeuvres that took place recently off the Fifth of Forth. The Royal Air Force attacked the British Navy and interesting "baiter" resulted. Looking through the clouds a warship can be seen while hidden from it by clouds hovers a bombing squadron.

## DEFINITE SIGNS OF ECONOMIC RECOVERY NOTED

Ottawa, Ont.—Reduced taxation and sound financial policies are the only means of lightening Canada's present burden and of bringing about an era of balanced budgets, J. MacLeod Clarke, secretary of the Canadian Chamber of Commerce, told the eighth annual convention of that organization. His report noted with satisfaction that federal and provincial budgets have been reduced in the current fiscal year by some \$50,000,000.

The secretary reiterated the Chamber's willingness to assist the government in its efforts to bring about a national committee along the lines of the May committee in the United Kingdom to bring about necessary reforms in governmental expenditure.

With regard to unemployment insurance, the secretary said that the Chamber take no further action in the matter "other than to watch carefully any legislation which may be proposed to this end, with a view to assisting in the drafting of laws which will be sane and sensible."

Five losses were reduced in 1935 from 1931 and a helpful signal was that in the last year 88 per cent. of the losses were covered by insurance, an increase of eight per cent. over the previous two years.

Thirty-five boards or chambers took part last year in the contests to prevent fire losses held by the Canadian Chamber of Commerce. For cities over 50,000, Toronto won the silver shield. Kenora, Ont., was winner for cities under 15,000, with Prince Albert, Sask., second.

Increasing interest was also shown in the report submitted to the convention for the health and safety contest. Winnipeg won the class one for cities of over 50,000 population and Vancouver second.

Slow return to normal economic conditions is being reflected in the greater confidence and more hopeful outlook of the Canadian people, said A. O. Dawson, executive chairman of the chamber.

It was a "definite improvement" which has in the main been attempted," said Mr. Dawson, possibly the most important feature of the recovery being the narrowing gap between Canadian farm products and the prices of manufactured goods.

Manufacturing activity has been quickened. Pig iron production made some progress during the second quarter of the year. While producers of automobiles, textiles and boots and shoes have been "extremely active" and more favorable markets are now looming in the United States and in the United Kingdom for our new products and lumber respectively."

The unemployment situation had been bettered to the extent of 20,000 formerly idle men finding employment since April.

Evidence of improving foreign trade was seen by Mr. Dawson in the fact that Canada had recovered fifth place among the world's exporters.

Mr. Dawson listed "some of the business that still press us," as follows: Taxation weighty and onerous; the unsatisfactory railway situation, farmers' dissatisfaction with meagre returns for long hours and hard work, unsatisfactory wages to industrial workers "which must surely lead to trouble" and curtailment of church, hospital, educational and charitable activities as a result of curtailed revenue.

The importance of conditions in foreign lands should not be overlooked, continued Mr. Dawson. Definite advancement on the road to normalcy was evident in the United States, and the international co-operation brought to bear recently toward the

## TO RETIRE

Dr. Frank T. Shutt, Chemist and Assistant Director of the Dominion Experimental Farm at Ottawa, who retires this month after more than forty-five years' association with the Experimental Farm.

solution of the wheat problem had aroused hope that "international agreement may be extended to other natural commodities in the near future."

## Huge Air Liner Wrecked

Caught Fire From Explosion And Destroyed

Chesterford, Ind.—The scattered bits of a giant twin-motor transport plane—one of its massive wheels hurled suspended from a tree—was all that remained of a New York to Chicago ship of the United Air Lines that carried its seven occupants to a terrific death.

Just what happened when the all-metal ship with a top speed of more than three miles a minute crashed to earth in flames about five miles south-east of here, probably never will be known, but witnesses said they heard a terrific explosion.

Five of the bodies were recovered, but none was kept out alive as the greater confidence and more hopeful outlook of the Canadian people, said A. O. Dawson, executive chairman of the chamber.

It was a "definite improvement" which has in the main been attempted," said Mr. Dawson, possibly the most important feature of the recovery being the narrowing gap between Canadian farm products and the prices of manufactured goods.

## Visible Wheat Supply

Heavy Increase Shown Over This Date Last Year

Ottawa, Ont.—Canadian elevators brought with 235,170,472 bushels of wheat on October 6, it was reported by the Dominion Bureau of Statistics. This was an increase of 7,655,939 bushels from the previous week.

On Oct. 6, the visible supply was 210,932,680 bushels. Canadian wheat stored in the United States consisted of 6,541,114 bushels, compared with 11,028,622 bushels a year ago. Wheat in transit on the Great Lakes consisted of 2,206,618 bushels, compared with 6,082,030 bushels last year.

United States wheat in Canada was shown as 2,991,168 bushels, compared with 8,315,062 bushels last year.

Landslide Buries Nineteen Tegucigalpa, Honduras.—Official reports from a village 30 miles east of alive in a landslide which struck the village of Apolepi. The reports said that 19 persons were buried and the village. Many houses were destroyed. In the same district the Tegucigalpa river had fallen in a series of drownings some people and numerous cattle.

## War In The Air

British Flying Boat Armed With Heavy Gun

Pelissawong, Eng.—The air ministry's base here harbored the first service aircraft in the world to be armed with a heavy gun firing high explosive shells.

The new flying boats being built at Brough, Yorkshire, for the Royal Air Force, the machine was flown here on its maiden flight. In the war trial four aeroplanes were unable to carry anything heavier than a machine-gun, although the British, of course, have been standard equipment on bombers for many years.

The new machine's armament included a gun capable of firing 15-pound shells, and three machine-guns, the whole installed on what is virtually a 14-ton flying gun platform travelling at 152 miles an hour.

The long-standing problem surmounted by the builders of the new aircraft was that of providing for the recoil upon an aeroplane of the heavy gun. Intensive trials will now be given to the craft, and when with the other of the quartette, it is expected to form a squadron to be stationed at Malta.

## Time Cut By Forty Hours

Kingsford-Smith Made Fast Trip From England To Australia

Wynham, Australia.—Wing Commander Sir Charles Kingsford-Smith clipped more than 40 hours from the England-Australia flying record when he landed here to the cheers of a mighty throng of welcomers.

The famous aviator, hero of a Pacific crossing and numerous other feats, was met by a large crowd at the airport. The breaking of the England-to-Australia flight record by Sir Charles Kingsford-Smith was such an important news in London that it was carried in the newspapers as war deeds and disarmament.

News of the Australian's success was met with a cheering in London. Information of the king, who has taken a keen interest in the flight.

## SOLID OPPOSITION TO RE-ARMING FOR GERMANY

Geneva, Switzerland.—Chancellor Adolf Hitler, of Germany, confronted with staunch opposition to re-arming from the United Kingdom, the United States and France, was forced into a position of deciding whether to acquiesce in the re-arming of the world war without immediate possession of war materials.

In a swift movement climax of the disarmament developments, the United States joined Great Britain and France in a united position against an increase of German armaments.

It was revealed in French circles that the United States representative, Norman H. Davis, told Foreign Minister Paul Boncour that American opposition to re-arming had been made clear at Washington.

Indications were that slow but steady progress was being made toward a solution of disarmament problems despite difficulties still existing on practical points between France, Great Britain and the United States.

Mr. Paul-Boncour was immensely pleased at the American attitude. France has always been opposed to any German re-armament proposal. At a three-power party, Great Britain through its foreign secretary, Sir John Simon, took a decisive stand in the same direction.

Indications continued that adjustment would be made in a spirit of conciliation which will satisfy German opinion, the British Government is known to oppose allocation of military armaments.

It appeared that the British position against re-armament had become even more rigid than that of the French.

## U.S. Recovery Plan

Sir Joseph Stamps, British Economist, Says N.R.A. Not A Success

London, Eng.—Sir Joseph Stamps, the economist, claims that American production had fallen off despite efforts of the N.R.A., especially in the construction field.

He asserted some industries were showing no signs of improvement and that creation of public employment was a definite failure. He expressed the opinion that the N.R.A. was increasing costs but not purchasing power. He added: "America might succeed in spite of herself because of her youth and vigor."

## WOULD OPEN WAY TO TRADE WITH CANADA

Ottawa, Ont.—A business-like and unbiased view should be taken of the trading situation between Canada and the United States, H. H. Harriman, president of the United States Chamber of Commerce, told the eighth annual convention of the Canadian Chamber of Commerce.

The declining trade between the two countries was regarded by Mr. Harriman as "ominous." It made him wonder if the United States tariff enactments had destroyed trade that would be mutually profitable to both countries. And if similarly the Ottawa agreements with other empire countries had diverted trade into channels "which were not dictated by economic considerations."

"The United States Government has already initiated conversations with various governments to determine whether or not there are possibilities for bringing about reciprocal tariff agreements," said Mr. Harriman.

"It has always seemed to me that between two countries such as Canada and the United States, where production costs and other expenses tend to equalize each other, it would be possible to arrive at some formula permitting a reasonable amount of fair competition in both countries of the products of the other."

"In the Ottawa agreements, as between Canada and the United States, you have indication of a formula that would approach a basis for reasonable competition between British and Canadian goods. It is not a fair starting point in any reciprocal agreements between Canada and the United States. It is a workable formula whereby the rates of duty between the two countries would tend to be only those necessary to assure a reasonable degree of protection to the home industry."

## Amend Irish Constitution

Steps Taken Towards Establishment Of A Republic

Dublin, Ireland.—Without a division and with very little debate, the Dail today passed the final stages of three bills amending the constitution by steps described by opponents as a move toward the establishment of a republic.

These bills transfer from the governor-general to the executive council the function of recommending monetary appropriations; seek to abolish the right of the governor-general to withhold consent to any bills passed by the legislature; and abolish the right of appeal to the privy council.

The measures now go to the senate, where there is an anti-government majority. By declining to act, the senate can hold them up for 18 months, after which they would become law.

## Moving Charges Paid

Farmers From Dried Out Areas

Saskatoon, Sask.—Aiding in the trek of dried-out district farmers to the north of the province, the Saskatchewan government has passed an order-in-council providing for 100 per cent. assistance in the transportation of stock, feed and effects. Freight costs in toto are being borne by the provincial and federal governments and the railway companies.

Such provision already has taken effect in Alberta. Both provinces now provide the same measure of assistance.

This news was announced Thursday by Hon. W. C. Buckle, provincial minister of agriculture, who addressed the convention of the Saskatchewan Liberal-Conservative Association.

## Had Clause Changed

Geneva, Switzerland.—Germany won a victory on the Jewish question by forcing the League of Nations assembly to reject a clause in a resolution German delegates felt was aimed directly at their government's treatment of Jews. As adopted, the measure expressed the hope all countries regardless of whether they signed the pact would follow in Germany's footsteps.

Such provision already has taken effect in Alberta. Both provinces now provide the same measure of assistance. This news was announced Thursday by Hon. W. C. Buckle, provincial minister of agriculture, who addressed the convention of the Saskatchewan Liberal-Conservative Association.

## Want To Settle

Calgary, Alberta.—Aetna Life Insurance Company, Hartford, Conn., holders of \$100,000 of city of Calgary bonds, which the N.R.A. was to pay New York exchange upon maturity last January, has made over the option of settling the New York exchange rates. It was disclosed by Mayor Andrew Davidson.

night, October 23rd, at 7:30  
o'clock. A good attendance is  
requested.

## Hopkins Old Time Orchestra Big Success

The dance on Friday evening  
which was sponsored by the  
Elks, and at which Hopkins'  
Old Time orchestra supplied  
the music drew one of the  
largest crowds ever seen in the  
hall. The crowd was widely  
representative, apparently  
every section of the country  
providing its quota. The music  
was highly approved by every-  
one and their return engage-  
ment on November 17 is keenly  
anticipated.

## In Memoriam

In loving memory of our dear wife  
and mother, Hazel, who passed away  
October 18th, 1931.

A silent thought, a secret tear,  
Keeps her memory ever dear.  
—Guy Dow, Barbara and Laddie.

## Card of Thanks

I wish to extend my sincere  
thanks to the Junior C. W. L.  
and many friends for the beau-  
tiful flowers, fruit and other  
gifts sent to me during my  
recent illness.

Edna Ohlbeiser
